// EDUCATION

BS Software Engineering
International Institute of Science, Arts and Technology (IISAT), Gujranwala
September 2026 | CGPA 3.7

// CERTIFICATIONS

- **Microsoft Azure Fundamentals (AZ-900)**
  Microsoft
- **Generative AI Application Developer**
  HEC NCEAC
- **Advanced Python**
  NAVTTC
- **Foundations of Agent-Based AI Systems**
  LearnQuest
- **Power BI Fundamentals**
  DataCamp
- **National Skills Test 2026**
  Score 88.1

// LANGUAGES

Urdu	Native
English	Professional

// INTERESTS

- Coding and building AI tools
- Prompt engineering and AI content
- AI agents and agent workflows

// PROFILE

Python Developer and Data Analyst with hands-on experience in **Python, Django, REST APIs, SQL, data visualization and LLM-based applications**. At Techohub Data Analytics and AI, worked on business analytics, dashboards, reporting and data driven solutions. Developed an **AI Career Readiness System** that analyzes resumes and job descriptions, performs ATS scoring, identifies skill gaps and provides career recommendations using LLMs and NLP techniques. Also experienced in deploying AI applications with **Docker and Hugging Face Spaces**.

// SKILLS

Programming
Python | SQL | PHP | HTML | CSS | Bootstrap

Generative AI and Agents
Generative AI | Prompt Engineering | Agent Workflows | LangChain | LLaMA | FAISS | Hugging Face

Backend and Tools
Django | Streamlit | Gradio | PyMuPDF | Docker | Git | HF Spaces

Data and Analytics
Power BI | pandas | Matplotlib | Plotly | Web Scraping | Data Visualization

// EXPERIENCE

Data Analyst
Jul 2024 to Feb 2025
Techohub Data Analytics and AI
- Joined as a 3-month intern and stayed on as an employee.
- Analyzed data with Python, SQL and Power BI.
- Built visualizations and reports used to support decisions.

Focal Person
Jan to Feb 2026
ISPR Internship Program

AI Research Program Participant
H&T Tech Solutions, Rochester, NY (Remote)

// PROJECTS

AI Career Readiness System

FINAL YEAR PROJECT

Python | Django | Groq LLM API | FAISS | Hugging Face | PyMuPDF | Docker

- Engineered a full-stack dual-portal recruitment platform using Django REST Framework and PyMuPDF, automating structured resume parsing and multi-role candidate/recruiter workflows
- Implemented Sentence-BERT (384-dimensional vector embeddings) and cosine similarity for semantic job matching
- Engineered a deterministic ATS scoring algorithm with entry-level fairness rules and a zero-fabrication CV optimizer using Groq LLMs and Pydantic schema validation to prevent AI hallucinations
- Built a dual-role ecosystem featuring a 4-week personalized skill gap roadmap generator and an HR portal with candidate privacy masking and automated profile ranking.

Analysis Your Next Step

HACKATHON PROJECT

Python | Gradio | LangChain | Groq (Llama 3.3 70B) | pypdf | FPDF

- Seven-step career tool: reads a PDF or TXT resume, suggests the five best-fit career fields and scores readiness for the one chosen.
- Checks a pasted job description and writes a gap report for a 3, 6 or 12 month plan, with learning links.
- Rewrites the resume against the job description for up to three rounds, using only content already in it, and scores keyword match each round.
- Also produces a cover letter PDF in three templates and colours, and runs a short interview practice with feedback.

View live demo

WhatsApp Automation

WhatsApp

- Built an automation on WhatsApp that is currently running.
